**ENVIRONMENT IS
EVERYTHING**

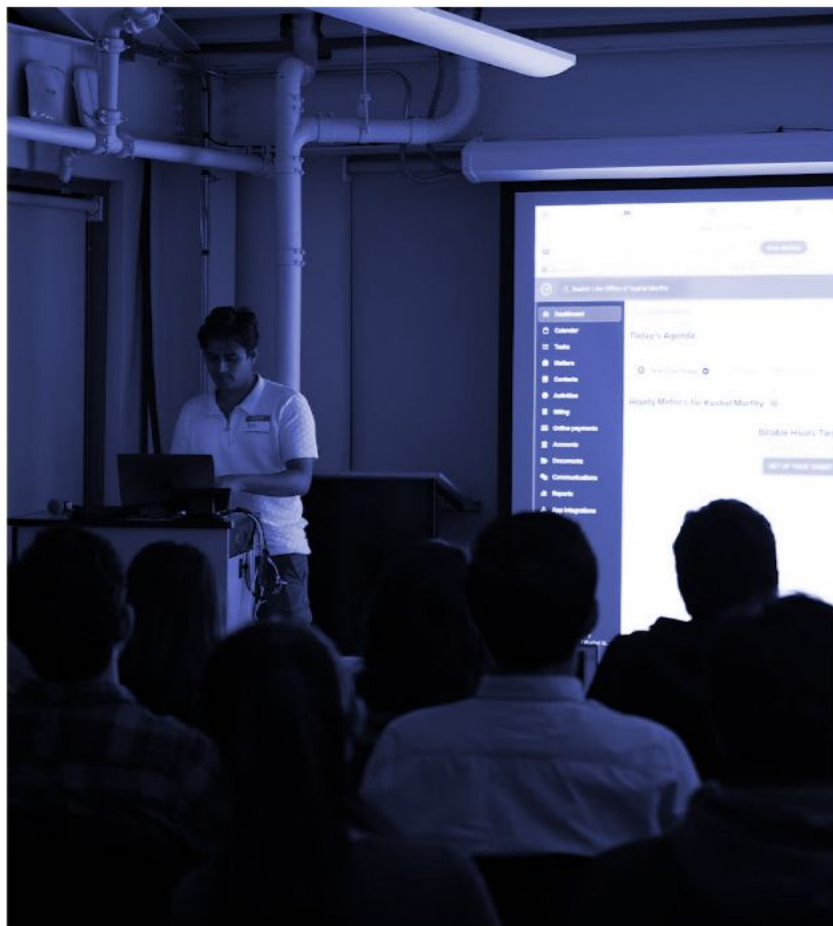

**EQUAL ACCESS TO
OPPORTUNITY**

**NURTURE EVERY
NICHE**

**CONNECTIONS
CREATE BRILLIANCE**

JOIN AI VALLEY

**AN EXCLUSIVE COMMUNITY FOR
AMBITIOUS PIONEERS.**

**DREAM BIGGER, BUILD BOLDER, AND
TRANSFORM REALITY.**

[AIVALLEY.IO](https://aivalley.io)

An all-in-one platform for caretakers, pet parents, and vets.

01. The update writes itself

One tap. The AI writes it.

02. Health tracked as you go

Meals, meds, notes, every session.

03. Owner, caretaker, vet — one record

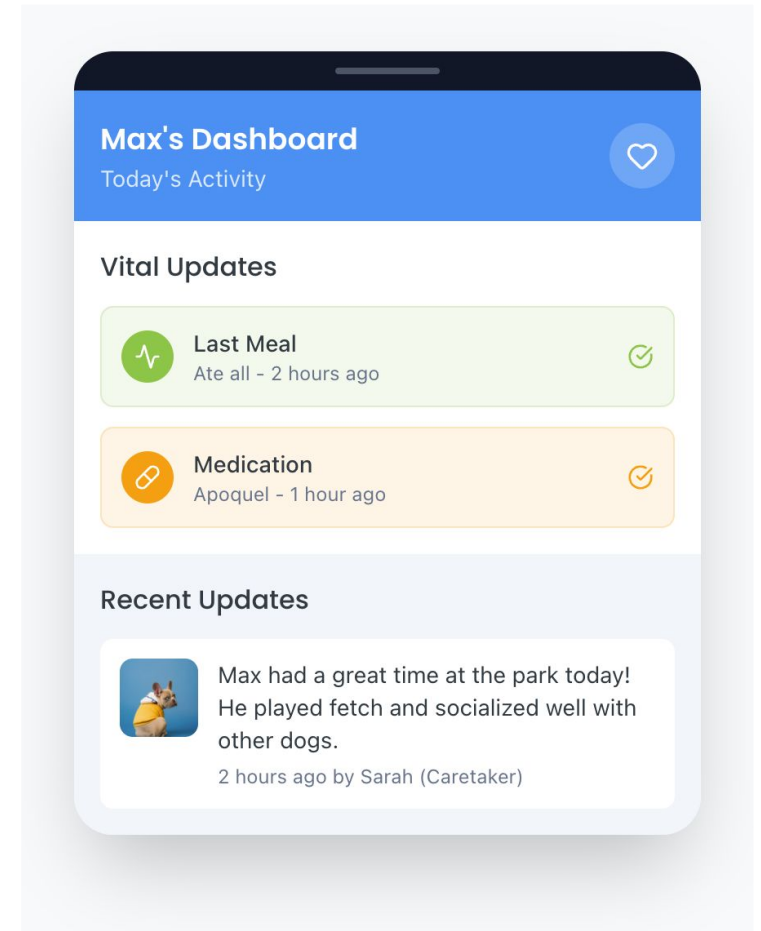

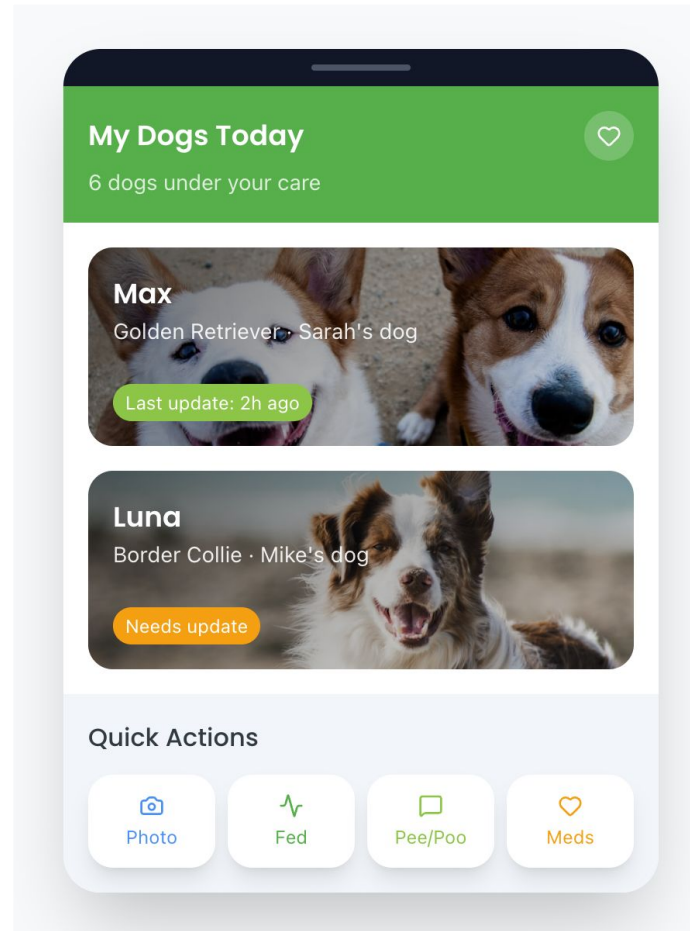

Meds, allergies, history. There in an emergency.

04. One app instead of five

Care, messaging, health, team access. On your phone.

Plus the business side.

Invoicing, billing, scheduling.

Let's Build!

Run a daycare or pet sit? Try it. Free to start.

Want to help build it? There's a lot left to build.

Just curious? Come find me. I'm here all day.

rj@petzen.app

What is Dogathon?

Dogathon is a community event bringing together builders, designers, developers, animal advocates, and rescue organizations to support dog adoption and animal welfare through technology and community engagement.

Walnut

Jesse

Karen

An all breed SF Bay Area foster based dog rescue.

Over **6000 lives** saved

Rescuing since **2008** from high kill shelters throughout CA.

Rescue & Educate

We also aim to educate the public on the importance of things like spay and neuter, spread awareness of the over pet population and advocate for dogs in need.

PetPoint is our core shelter management system, the system of record for intake, animal records, medical, foster, and adoption outcomes.

The image shows two overlapping screenshots of the PetPoint system. The background screenshot is the 'Animal: Intake' form, which includes fields for 'Intake Start Date' (1/17/2025 12:00 AM), 'Intake End Date' (1/17/2025 11:59 PM), 'Species' (All), 'Group By' (Intake Type), and 'Detail/Summary' (Summary). The foreground screenshot is the 'PetPoint Enterprise Reporting' dashboard, featuring a 'New Dashboard Report' button and a 'Fields' list with 'Report' and 'Shelter' options. A 'drag and drop a new tile here' instruction is visible on the dashboard canvas.

The image shows the 'Care - Behavior' interface for animal A0056702742. It includes a table with columns for 'Select', 'Animal #', 'ARN', 'Status', 'Name', 'Species', and 'Breeds'. Below the table are tabs for 'Search', 'Animal', and 'Tests'. The 'Animal' tab displays details for 'Lieutenant Purrito', a 'Domestic Shorthair - Black' cat, including its age, gender, and location. A 'Print' section offers options for 'Kennel Card', 'Documents', and 'Medical Documents'. A 'Jump To' section includes 'Outcome', 'Edit', and 'Care/Services'. A menu on the right lists various actions: 'Search/Edit Medical', 'Add Exam', 'Add Surgery', 'Search/Edit Foster', 'Add Foster', 'Search/Edit Behavior Test', 'Add Behavior Test', 'Search/Edit Activity', and 'Add Activity'. The 'Add Behavior Test' option is highlighted.

The Problems with This Shelter System:

01. Inaccessible Data

Intake, medical, foster and adoption data are not easily accessible.

02. Time-Consuming

Staff spend too much time on manual updates instead of care.

03. Unreliable & Outdated:

Kennel and location updates lag– staff works with incorrect information.

04. Hard to Scale:

No program fits the needs of a large multi-program humane society.

We would love builders to take on a **reliable, interoperable shelter data platform**, or a smart layer that sits on top of PetPoint, making its data trustworthy and accessible in near real time.

Scaling and sustaining foster capacity

Goal:

Grow and hold our foster program at scale

Target:

A sustainable recruitment and retention process.

Challenges:

- Recruit, onboard, match, engage, and retain foster homes at high volume
- Track active-home counts reliably systematically
- Overall replace manual patchwork for staff

Event Timeline

- 10:00AM** — Problem discovery with rescue partners and team formation
- 10:30AM** — Outdoor dog adoption and vendor area opens on Presidio Lawn #3
- 11:00AM** — Arcade.dev workshop: Building Agents That Actually Do the Work
- 12:30PM** — Lunch indoors and open building continues
- 01:30PM** — Mentor office hours, sponsor support, and product feedback
- 03:00PM** — Outdoor lawn portion closes and vendor/rescue breakdown begins
- 05:00PM** — Project submission deadline
- 05:30PM** — Final demos from selected teams
- 06:30PM** — Awards, prizes, and rescue impact moment
- 07:00PM** — Community hangout, food, and networking
- 09:00PM** — Event ends

BLDG 103, 103 MONTGOMERY ST

HELPING YOU FIND A HOME
EVERYONE WILL LOVE.

*From first homes to forever homes, we help **Bay Area** families buy with confidence and sell for exceptional results — **proudly 100% referral-driven.***

Dogathon is supported by UNO GROUP, a Bay Area real estate team founded by Keller Williams Realtor Huili Liao, helping professionals and families with buying, selling, relocation, investments, and more.

If you're looking to rent, buy, sell, invest, or find office space in the Bay Area, join UNO GROUP's WhatsApp community for resources and opportunities.

BUYING

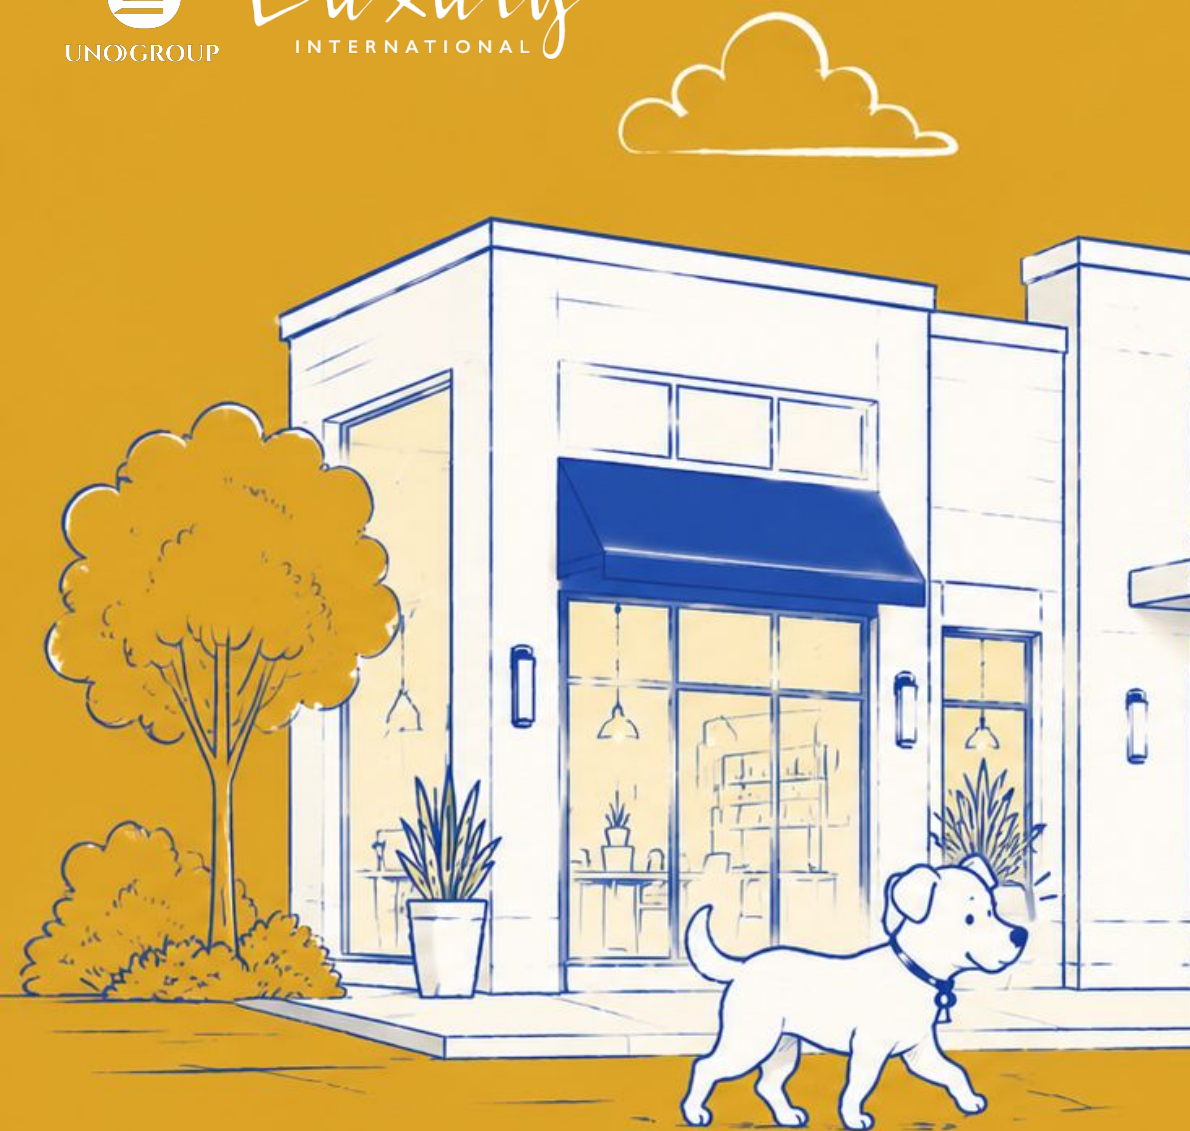

Finding the right home for every member of the family.

SELLING

Thoughtful preparation, strategic marketing, stronger results.

INVESTING

Helping you make smarter long-term real estate decisions.

OPENING, RELOCATING, OR EXPANDING YOUR BUSINESS?

We'll help you find the right space. From **overseas to San Francisco** — recently helped an AI infrastructure company secure its space and establish its U.S. presence.

Judging Process

01. Approach & Idea

Is the solution viable, creative, and relevant to a real-world problem/business viable?

02. Technical Execution

How robust, functional, and technically sophisticated is the project?
Are they able to execute their primary features live?

03. Presentation

How robust, functional, and technically sophisticated is the project?
Are they able to execute their primary features live?

04. Design

Is the product user-friendly and thoughtfully designed?

05. X-Factor

Does the project surprise or delight? Does it stand out from others?

Submission

Deadline to submit your project:

Saturday, Aug 22nd, 2026
5:00 PM PST
